Product description

Round pole dance mattress is the perfect solution for pole dance schools, dance schools and aerial studios. The round shape allows for optimal use of the exercise space, thanks to which larger mattresses can fit in the room. Inside each of our pole dance mattresses there is high-density foam, which perfectly absorbs falls and allows you to jump out of the mattress. If you are fed up with soft mattresses in which your students sink, then you have just found the solution to your problems.

We ensure the highest quality, functionality and safety during training.
