Product description

A taped aerial hoop is a steel aerial hoop wrapped in a special cotton tape.

Aerial hoop is an apparatus for performing aerial acrobatics. It is an ideal device for strength, gymnastic, stretching and choreographic training.

Our aerial hoops guarantee the highest quality and safety. We are one of the only manufacturer of aerial hoop with official certificate of independent certified unit TUV NORD.

Verified product
No: 0000090253
certifikat.tuv-nord.pl

We make many types of hoops, but for taping we offer main 2 of them

- 1-point aerial hoop (most popular)
- 2-points aerial hoop

As a manufacturer, we also offer the entire spectrum of available sizes of aerial hoops from 85 to 105 cm (every 5 cm). Aerial Hoop diameter selection is the very important process. We produce aerial hoops with an outer diameter of 85, 90, 95, 100 and 105 cm. The hoop diameter should be selected according to your height. We recommend choosing the diameter of the aerial hoop using following method.

How to choose the best aerial hoop diameter for you?

It is very simple. Sit on a chair, then ask someone to measure the distance from sitting point to the top of your head. Then add 12-15 cm extra. And the result is the perfect size for your hoop.

If you are not sure about the perfect size for you – always choose bigger one especially when you buy hoop for your child, who is growing fast.

All hoops are powder-painted black as standard, therefore we have introduced a new product – a taped aerial hoop. We use the best professional tape Tape Snake Prodigy, which have been made specially for aerial hoop taping.

What are the advantages of taping the aerial hoop?

- better grip
- the tape absorbs sweat which prevents hands from slipping
- softer surface of the hoop - the tapes are made of cotton

-
- better design – you can choose the color of taping

Available colors of snake prodigy hoop taping:

- white
- black
- red
- purple
- blue
- green
