Aerial Hoop 2-points

Price	148.00 Euro
Availability	Available
Shipping time	48 hours

Product description

In our offer you will find both Aerial Hoops with single and double handle. An Aerial Hoop with two handles is usually chosen by beginners. It seems that the greater number of handles increases stabilization, but in reality it depends on the individual preferences of the user. Double-handle Aerial Hoops are used in IPSF competitions.

Aerial Hoops with two handles are made of high-quality steel pipes, to which two brackets with a spacing of 70cm are welded. Thanks to this, the Aerial Hoop does not rotate when performing elements on the upper rim and has enough space to perform doubles.

If you are wondering which Aerial Hoop to choose, read our article on AERIAL HOOP - HOOPS FOR AERIAL ACROBATICS. However, due to the widespread use of single-handle wheels, we recommend choosing this model. Unlike the aerial hoop with two handles, it is very often used in competitions, so it is worth learning to use Aerial Hoops with one handle from the beginning.

See also our single-handle circus wheels.

If you are interested in aerial acrobatic, be sure to check out our blog about aerial silks.

This product has additional options:

Hoops - size: 75 , 80 , 85 , 90 , 95 , 100 , 105 , 110
