Big connector for aerial hammocks

Price	24.60 Euro
Number	AZ017_DK

Product description

Galvanized steel carabiner.

A steel carabiner made by the Polish company PROTEKT.

Its large clearance and high durability make it possible to attach both hammock knots to it.

Equipped with a screw lock in the key-lock system, which will ensure safety during exercise and facilitate quick assembly / disassembly.

Parameters:

strength with an open lock - 20 kN

weight - 200 g

CE 1015, EN 362

ATTENTION:

The connector is galvanized, the galvanization may wear off during use and its fragments may fall apart. The connector can be used until max. 1mm cut inside the material. After such cut to a thickness of 1 mm, the material (steel) - the connector should be discarded.
